

calculated for each category. All independent stations that are available via satellite and that could qualify as superstations were excluded from the number of non-ADI stations carried due to the fact that the questionnaire did not solicit information as to the manner in which signals are obtained (i.e., off-air, via satellite or via microwave) and the fact that cable systems remain free to change the manner of reception to satellite delivery in order to avoid the retransmission consent requirement.

A further breakdown was performed to show the lengths of time that non-ADI stations have been carried on the cable systems. Results for length of carriage are broken down into categories of 0-4 years, 5-9 years, 10-19 years and 20 or more years. Because not all systems carrying stations from outside their ADI indicated how long such stations have been carried, the percentage supplied for each category is the percentage of stations for which length of carriage is provided.

Finally, data as to off-air availability was collated for all non-ADI stations. With respect to multiple ADI systems, data was limited to only those stations from outside all of the ADIs in which the cable systems were located. Results indicate the percentage of non-ADI stations for which information was reported that can be received off-air in any portion of the cable system service area.

C. RESULTS

The results of the PCTA survey, which are summarized on Table 1, clearly indicate that the retransmission consent provisions of the 1992 Cable Act could potentially cause widespread disruption to existing viewing patterns if broadcast stations are unwilling or unable to grant retransmission consent. Eighty-five percent of all cable systems responding to the survey fell within a single ADI. Three quarters of those single ADI systems responding (74.2%) carry at least one non-superstation commercial broadcast signal from outside of their ADI. Nearly half of those responding (46.3%) carry at least three such stations. With respect to cable systems that serve subscribers located in more than one ADI, the results are slightly lower but still significant. Nearly two-thirds (62%) of such systems carry at least one station from outside of any ADI in which their subscribers are located and more than a third of those systems (38%) responding carry at least three such stations.

It is also significant that most of the stations subject to retransmission consent are stations which have been carried on the cable system for more than a decade. With respect to single ADI systems, more than three quarters (76.9%) of the non-ADI stations for whom data was reported for the length of time carried were carried for ten years or more. Nearly two-thirds (65.9%) of the stations have been carried for 20 years or longer. Likewise, the results for multiple ADI systems, though slightly

lower, are nevertheless significant. Nearly two-thirds (65.3%) of the non-ADI stations carried on such systems have been carried for ten years or more. Nearly half (42.3%) have been carried for 20 years or more.

Ironically, the preponderance of stations which cable systems will be required to delete if they are not able to obtain retransmission consent are stations which are viewable over-the-air in the cable system service area. Approximately two-thirds of the non-ADI stations carried by both single ADI cable systems (66.4%) and multiple ADI cable systems (62.9%) are available off-the-air in some portion of those cable system service areas.

The results of the PCTA survey demonstrate that the retransmission provisions of the 1992 Cable Act will have a far reaching impact on the number of cable systems affected and have the potential for causing widespread disruption to established viewing patterns on those systems if stations either are unable to grant retransmission consent or are willing to grant such consent only upon unreasonable terms and conditions.

TABLE 1

Summary of Results

178 systems members cover 93%
of cable subscribers in Pennsylvania

Surveys mailed to all 178 systems - 141 responded (79%)

Single ADI Systems: 120 responses (85%)
Multiple ADI Systems: 21 responses (15%)

I. SINGLE ADI SYSTEMS

A. Carriage

<u>No. of Stations Carried from Outside ADI</u>	<u>No. of Respondents In Category</u>	<u>Percent in Category</u>
At least 1	89	74.2%
At least 3	56	46.3%
At least 6	9	7.5%

B. Length of Carriage

283 stations carried from outside the respective ADI
255 stations - data reported for length of time carried

<u>Length of Time Carried</u>	<u>No. of stations in category</u>	<u>Percent of Stations for which Data is available</u>
0-4 years	35	13.7%
5-9 years	24	9.4%
10-19 years	28	11.0%
20+ years	168	65.9%

C. Off-Air Availability

283 stations carried from outside respective ADI
269 reported data re: off-air availability of such stations
188 available in some areas of the ADI off-air (66.4%)

TABLE 1**Summary of Results (continued)****II. MULTIPLE ADI SYSTEMS****A. Carriage**

<u>No. of Stations Carried From Outside all ADIs</u>	<u>No. of Respondents In Category</u>	<u>Percent in Category</u>
At least 1	13	62%
At least 3	8	38%
6 or more	1	5%

B. Length of Carriage

30 stations carried from outside all ADIs
26 reported instances for length of time carried.

<u>Length of Time Carried</u>	<u>No. of Stations in Category</u>	<u>Percent of Stations for which Date is Available</u>
0-4 years	3	11.5%
5-9 years	6	23.1%
10-19 years	6	23.0%
20+ years	11	42.3%

C. Off-Air Availability

30 stations carried from outside all ADIs.
27 stations reported date regarding off-air availability
17 available in some areas of the ADI off-air (62.9%)

EXHIBIT A

PCTA Survey Questionnaire

Pennsylvania Cable Television Association

119 Pine Street

Harrisburg, Pennsylvania 17108

Phone (717) 234-2190

October 30, 1992

Dear PCTA System Member:

The S. 12 battle has now shifted to the FCC. As you know, the Commission must come up with 18 rulemakings in the next year. Two of the more important ones, retransmission consent and cable rate regulation, are in the first group. The FCC is under the gun to comply with November 5th and December 11th deadlines for these Notices of Proposed Rulemaking. PCTA is committed to suggesting reasonable language to the FCC that will best serve consumers and cable operators in Pennsylvania.

We need your help and we need it quickly.

S. 12 brings us a new term, ADI. ADI, or Area of Dominant Influence, is a broadcast term used by the FCC; however, on October 6, 1993, the ADI will determine which stations we must carry or obtain retransmission consent to have on our channel lineup. Every county in Pennsylvania resides in one of eleven ADIs. The enclosed ADI map will help you fill out the questionnaire and return it to PCTA in the postage-paid envelope today. Suggested language is needed at the FCC shortly after the Notice is released, so your prompt response is appreciated.

The questionnaire is short and self-explanatory. If you have any questions regarding the ADI Questionnaire, please call Stan Singer at PCTA state office, 717/234-2190.

Thank you for your prompt attention to this important matter.

Sincerely,

Joseph S. Gans III
Chairman

Enc.

Cable TV. More Than Meets The Eye.

ADI QUESTIONNAIRE

Dear Chairman Gans:

We have reviewed your letter and the ADI list enclosed with the PCTA weekly newsletter. Here is the information you requested for our system:

- 1a. Our system serves municipalities only in the _____ ADI.
- 1b. Our system serves municipalities in the following ADIs:

2. Does the system carry any **commercial** television stations from ADIs other than the ADI(s) where the cable system is located.
Yes _____ No _____
3. If the answer to No. 2 is yes, please list the distant **commercial** ADI stations by call sign, channel number and city of license. Also, please indicate for each whether the station is generally receivable off air in your franchise area and the year it was added to your channel lineup.

Call Sign	Off Air Channel	City of License	Receivable Off Air	Year Carriage Commenced
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____
_____	_____	_____	_____	_____

System Name: _____
 Manager Name: _____
 City/Town/Zip: _____

Notes:

For multiple ADI systems, the number of stations carried from outside of each ADI as well as the number of stations carried from outside all of the ADIs is shown.

? indicates insufficient information provided

indicates more channels may be received off-air, but data not included

@ indicates "superstations" such as WPIX, WOR, WTBS, WGN, WWOR, KTLA and/or WSBK not included, meaning the number of stations which may have to be dropped could be higher

(1) any ADI identified as Harrisburg means
Harrisburg-York-Lancaster-Lebanon

(2) any ADI identified as Johnstown means Johnstown-Altoona

(3) any ADI identified as Scranton means Wilkes Barre-
Scranton

c. is the abbreviation for circa (means "approximately"); so a station carried "since c. 70" has been carried since about 1970.
